

Fellow Citizen,

Did you vote for Obama? Are you wondering now if you might have made the wrong choice? Are you confused by some of the things our government is doing?

I know you hear some of the conspiracy theories about Obama's birthplace, that he's a Muslim, that he wants to make America into a Socialist country, and so many more - and you think that it's all just too far-fetched to be true. How could that possibly happen in America? But then there's still that little spark of doubt that makes you wonder in what direction the United States is headed.

Here's the thing - don't just sit around and wait for your information to come from network media and hysterical bloggers! Do some research for yourself so you can make an informed decision.

For instance, why is Bill Ayers, (the man who, In 1969, co-founded the Weather Underground a self-described communist revolutionary group that conducted a campaign of bombing public buildings during the 1960s and 1970s), a featured speaker at the upcoming San Francisco Green Festival? This information comes from Wikipedia and GreenFestivals.org. It took me about 2 minutes to gather this information - it's not hidden.

The information is out there. Get informed so you can decide for yourself. If the 912ers and Tea Partiers are wrong - then they're simply wasting their time. If they are right, then there is no time to lose. If you care about the future of this country, your own future and the futures of everyone you love - then don't just sit around saying Fox news is crazy and CNN is all-knowing. Find out the facts for yourself and then be active in shaping the future you want for this country that we are so fortunate to call home.
