

Sir or Madam,

Contrary to Congress' popular belief, healthcare is NOT A CONSTITUTIONAL RIGHT, it is a commodity, an article of trade, a product.

During your campaign and once you are elected/re-elected, I strongly urge you to push for and then work on repealing the healthcare legislation. This horrific legislation was forced on millions of Americans that loudly voiced, "WE do not want it". Yet Congress refused to listen to us and passed it anyway, AGAINST the will of We the People.

Many of us realize the way Congress has come to regard their constituents. It is the worst case of disregard I have ever seen in my lifetime and is very reminiscent of the way England treated the colonists. Do you really want history to repeat itself? Despite what many in Congress may believe, this country is at a tinder box stage. The people are fed up, actually, much more than fed up.

This legislation is unconstitutional for many reasons. Forcing people to buy a product they may not want, forcing changes in the product people are satisfied with, government involvement in patient/doctor decisions, reduction or elimination of services. This list goes on and on. One of the worst things to come out of this bill is TAXATION WITHOUT REPRESENTATION! Does that phrase ring any bells? It should, if you know your history. Additionally, if you do know your history, you should also know what happened!

Besides, if this is such a wonderful plan, why isn't Congress and EVERY American required to be on it, including the very rich? The very fact that Congress has exempted itself from this makes it abundantly clear to anyone with common sense, that there is something seriously wrong with it. This is nothing more than a power grab and a redistribution of wealth. Yes, We the People remember Mr. Obama's comment on that very belief during his campaign for President. This legislation is wrong for Americans and if you look into your heart, you know it is too.

If you want to know how healthcare reform should be, ask your constituents! We are quite capable of letting you know what we think should be fixed, how we'd like to see any changes handled and all done very concisely and intellectually! Give us the chance, you just may be surprised. Any legislation this big and encompassing that takes control of this much of the nation, should really be put up to a vote by the people, not just crammed through in Congress.

Please understand, my support during your campaign and vote on election day are very much tied to pushing for and then working for the repeal of healthcare legislation. I am urging everyone I know to do the same. It's time to start listening to We the People again. We don't care what you want or what you believe is best for us. We know what is best for ourselves. We also know that you work for us, NOT the other way around!

Regretting your current decisions,
