

Dear Congressman Issa,

This letter is to inform you of great support for you as Chairman of the House Oversight Committee from your fellow Americans! "We the People" realize the daunting task you have in investigating the last 2 1/2 years of the Obama Administration. We are watching and we are listening to you in your hearings, and we are outraged at the things we are learning about our President and our Government! We want you to know how much support you have across this wonderful country of ours, and we stand behind you in all the difficult work that lies ahead of you.

Your report on the Obama Propaganda being exposed is just the beginning!

We have watched as the Obama Administration has stonewalled the Investigation of Project Gun Runner as well! We know this goes all the way to the top!

The American people are quite a bit smarter than this Government administration gives us credit for. We pay attention to every single action being taken. We are informed citizens, probably more now than at any time in the last 50 years!

The failure of Mr. Obama's policies, combined with the massive increase in the national debt, rising unemployment, the implosion of the housing market, the stonewalling, the propaganda and illegal use of taxpayer money to further his agenda, the continued war in Libya without Congressional approval and a growing perception of incompetence, are coalescing factors to give weight to the demand that he resign or be Impeached.

When republics start to ignore their founding documents, they are literally committing suicide and, in Obama's case, it is an assisted suicide.

Know that we are completely behind you and your efforts, Congressman Issa. We have been excitedly waiting for you to take control of the Oversight Committee. The American people deserve better than what we have received for the last 2 1/2 years. We know with our support for your efforts from all across the country, you will see these investigations through to the proper disposition. We feel our country cannot survive even the rest of Mr. Obama's first term in office. How would we ever live through a second term?

Thank you for all that you are doing. The Country appreciates you and we support you in all your efforts.

Very respectfully yours,
